Title:

Comments: On Stand I.D. # 092001001450040, proposed for "Group Selection", a walk through those woods proves this is a mature forest, precisely the type of carbon storage entity envisioned by President Biden in his executive order directing federal agencies to consider carbon in planning on all projects.

The same is true of Stand I.D. # 09200001001450042, proposed for "Individual Tree Selection".

The same issue above applies to this stand, but also of concern is the fact that the terrain is steep in places here and runoff problems could be exacerbated. It is also a hub for many recreational activities.
