Title:

Comments: I object to the proposed Telephone Gap timber sale. This project will destroy important habitat, damage water quality, and disrupt life in a large portion of the Green Mountain National Forest. These forests and the creatures that call these acres home deserve our protection and care. Destruction of forests for the profit of the few continues practices that endanger our very existence. It is the responsibility of our land and resource management bodies to safeguard the well being of all people, and this means working to combat climate change, not exacerbating it by destroying mature trees that sequester carbon.

I am a life-long Vermonter. I love the forests of our Green Mountains. Please don't allow a portion of this precious public resource to be despoiled by logging.
