Title:
Comments: I am writing to express my opposition to the Integrated Resource Project Proposal at Telephone Gap. This proposal is based on outdated information and I am surprised and saddened that it is allowed to go forward as such. I do not have much time to write a comment full of all the relevant facts and evidence that show that this proposal should be rejected because I just gave birth to my first child. For her, can we leave old forests standing? For her, can we be less nearsighted in our considerations of a healthy future? I want this for my five week old daughter and for all children, and all of our other-than-human relatives. I believe we can work locally with regional loggers while simultaneously protecting healthy forests, mature trees and leaving great connective carbon sequestering ecosystems largely untouched. Please leave the Telephone Gap wilderness alone.
