Comments: "There is a time when the operation of the machine becomes so odious, makes you so sick at heart, that you can't take part. You can't even passively take part! And you've got to put your bodies upon the gears and upon the wheels, upon the levers, upon all the apparatus, and you've got to make it stop! And you've got to indicate to the people who run it, to the people who own it that unless you're free, the machine will be prevented from working at all!"

This proposal indicates that the USFS is part of the machine. The endless destruction of the forests - the only thing that is capable of absorbing emissions from humanity's rapacious thirst for fossil fuels - must come to an end. At this point in human history, we cannot lose any more mature trees to the machine.

There are those of us who will put our bodies upon the gears to stop this if necessary.
