Dear Environmental Coordinator Danika Carlson,

Dear Forest Supervisor Smith,

Please read through my edited version of the form email (where the only thought is a signed name at the bottom) you will be receiving from others.

I would like to add my voice to those who are concerned about the post-fire logging plans for the Taylor Creek area in the River Complex fire salvage proposal. I believe this is WONDERFUL. Please stand tall and know that these proposals are in the best interest of our continued use and health of our forests.

Instead of only focusing project activities on roadside hazard treatments and on the Wildland Urban Interface zone for the Scott Valley. Please utilize salvage logging backcountry wildlands in the headwaters of the Salmon River and other burned areas to help fund the projects and restoration that is needed for future generations to enjoy our wilderness.

In my opinion you are doing the right things by salvage logging as much as possible before the burned timber rots and no longer allows access to public forest, habitat benefits nor critical funding for truly beneficial activities . Use the funds generated to replant and control brush but if this project is delayed any further there will be no value to off set the costs of other beneficial projects. While you are creating salvage plans please consider thinning, road maintenance, direct fire suppression and timely logging actions on all areas of our forest so we don't have to have any more devastating fires.

Thank you for considering my concerns.

Sincerely,

Hayley Moyles

Sincerely,

Hayley Moyles
