Comments: Please consider allowing leaves development, in particular, the cross country ski areas is an incredible option to allow us more access to the forest. Cross country skiing is a much more affordable option than downhill because you don't have to buy a lift tickets so if you allow this, it gives people more options to enjoy the forest land during winter without such a high expense. I understand concerns with building development in the forest but it's also important to give people opportunities to enjoy nature and bring a lot to our community.
