Comments: National forest lands should be affordable for all to enjoy. Taos ski valley continues to spent millions of dollars to improve the area. What good is this to local New Mexican people? Price to use the national forest will be out of our reach. Common New Mexican people will not be able to afford the cost of these changes. Prices for at least Taos county residents if not New Mexican residents should be set so as local tax paying residents can afford to use our national Forrest. Price increases yearly to local residents, local tax payers should be set at lower price. Give us a chance to continue to enjoy Taos ski valley and our national forest. We are the base customers for the ski valley and we deserve a price that we can afford. Thank you for your consideration.
