Subject: [External Email]Please extend Hungry Ridge comment deadline so public can accessDear Supervisor ProbertPlease extend the Hungry Ridge SEIS comment period to this fall.In a reanalysis for the Hungry Ridge logging project, the Forest Service has found many more acres of what it claims is old growth, but because the project area is still snowed in, the public cannot access these areas to verify these claims.Please wait for the snows to melt so the public can verify your agency's representations as it seems easier to make corrections, if necessary, without further legal actions.Thank you.-- Douglas Elledge
