Title:

Comments: I, and many others are against the Gondola, and not only the Gondola but are also very against the mountain lodge around chair 7. Taos Ski Valley continues to take water from the local residents as well as businesses. They are not accounting for a changing environment let alone less water in the future period. They are stock piling water and using any excuse necessary. The ski valley is land for the public who deserve the access. They are pretty full of crap and lie over just about anything, as long as it helps their advantage. There is not enough water for the new St. Benard, but guess what, they are building it anyways. Why is this ok? Full stop on all future plans for at least a few years. You need time to adjust to the changing environment, not more infrastructure
