Comments: Providing a skills/enduro area at Rampart Riding Area would be invaluable to local and visiting riders. Rampart already offers a wealth of trail levels and a few obstacles, but having a focused training and obstacle area would be terrific. I and my group of 4-5 friends are enduro-type riders who thrive on this type of terrain. Rampart is close in proximity and I ride it often throughout the year, including day trips, occasional camping, Poker Runs, etc. I would definitely support the inclusion of this area, as well as assist in volunteering for its creation and maintenance. So many trails are lost to OHV-riding opportunities through lack of resources, money, environmental interests, etc. There has been great growth with some of the more-recent singletrack implementations; please allow the creation of this Skills Area to further increase the value of the Rampart Riding Area.
