Last name: Wright

Organization:

Title:

Comments: Having a skills area is a grwat addition to the OHV area. This allows users to expand their skills in a controlled area. Better skills allows riders to stay the trail and lower chances of injury on the trail. Its great to have an area where my son can learn how to jump logs prior to getting on the trail.

OHV recreation is one of Colorados great draws for tourism and quality of life for residents.
