First name: James Marc

Last name: Beverly

Organization: Beverly Mountain Guides

Title: Owner

Comments: TSV is gaining an exceedingly amount more than the public is gaining. Without assuring perpetual unfettered written access to the Williams Lake area, and areas accessible via TSV and their respective ownership of properties, it is not recommended that the area be allowed to proceed with the projects that will indeed impact the wilderness around the TSV properties and leased lands without making a significant contribution to those who will be collaterally affected. TSV should provide greater parking or overnight camping options free to the public as their likely income on their proposed projects will indeed increase their profits.

TSV should not be allowed to discriminate against any other entity and should offer the same opportunities with all other permit holders and business entities. Until this measure is met, TSV should not be allowed to expand their operations.
