Comments: Concerned about the trails of Mena project! Why not have it on 270 side where you have more access of land that's not being used. All that national forest that's going to be a state park provides more to the community than a mountain bike trail. You will be taking away 8,000 acers away that people use to provide food or even enjoyment in this small town. Like deer, bear, turkey, and squirrel hunting. You will be taking away the freedom of going into national forest and pursuing outdoor life. I've hunted that land with my grandpa and hunt it with my kid to this date. Please reconsider on this project or make it where we can still enjoy outdoor recreation on this soon to be state park!!!!!!
