Title:
Comments: One of the best features of this project is a designated riding area for entry-level riders, specifically children. The great part is adults can sit at a picnic table nearby and supervise. This is much better than kids riding around in a parking lot or in and undesignated area, which has problems in its own. Also, by having a more challenging area for more experienced riders gives them the opportunity to practice their skills instead of finding challenges off trail. I fully support this project and encourage this effort.
Thank you, Corey Corbett, President, Rampart, Range, motorized management committee.
