Comments: This trail system would benefit our community tremendously, in terms of economic growth and tourism. The poverty level and work opportunities in our area make it difficult for residents to make a living, and this trail system would infuse resources and jobs into the area and revive our small town. The appeal of having a gravity based trail system will make this an attractive tourist spot, resulting in additional growth and improved infrastructure for our county.

This system has my whole-hearted support. I have owned a business in this area for 20 years, and have been a resident for 31. This represents the exact kind of positive change our area has needed for years!
