Comments: I am not from this area, but I perform contract work for the local collage. I have been down in that area for about 15 years for work and pleasure. This area is ripe for growth and is a great place to visit. Great community, leadership and great people overall. I really enjoy being down there even though I end up working it most of the time. You could say a working vacation. These trails need to happen to help support this community, plus the area is gorgeous.
