Comments: I am writing to register my continued opposition and objection to the proposed Lake Tarleton Integrated Resource Project. I have been visiting Lake Tarleton and its surrounding area with my family and friends for over 20 years. I do so because of its scenic beauty which is due to its pristine and protected land. I am VERY concerned about the scope of the project as currently proposed and the negative impact it will have on the ecosystems, recreation, and beauty of the area.

I would like to see this land re-classified as MA 8.5 (scenic area) so that myself, my children and generations to come can continue to enjoy this area as it is now.
