Title:

Comments: I am a resident of MT Baldy and strongly support this project. There is a lack of resources for hikers in the Ice House and the upper canyon of MT Baldy. This area is subject to heavy use and having a resource at the trail head will benefit for hikers and the community. This benefit is above and beyond the important work this project does in helping injured in the service of our country. I believe this project promotes the proper use of our public lands and will provide a valuable resource for all stakeholders.
