Comments: Personally, I believe that the Trails at Mena project would bring economic growth and encourage an overall healthier lifestyle in Mena, AR. One thing that I have noticed over the years is that young adults typically are looking to leave the area in search of a better financial situation for their families and to be able to have more recreational activities available. The Trails at Mena would not only provide outdoor activities for the community, but would encourage tourists to travel from other areas and utilize our resources. With the increased foot traffic, our economy would thrive and we would see more restaurants and businesses opening in our area.
