Comments: Hi,

I'm writing in support of Taos's proposed development plans. I understand that there will be no increased water use, and I strongly believe that the structural changes will provide a significant improvement for all guests.

Twining Road is passable at best on a good day. The gondola will decrease that traffic, and provide an easier, alternate way of moving around the mountain, especially for those who do not ski or snowboard. On-mountain facilities will absolutely be beneficial to all who enjoy the mountains, and the water tank will only decrease the environmental impact on the land we all love.
