Comments: We support the proposed LAND EXCHANGE. We own tracts that adjoin some of the proposed Exchange tracts. Our prior dealing with the Upper Trinity Regional Water District(UTRWD) have always been straight forward and on the mark. They have always done what they promised(and more) and left the land better than they found it! We also believe that there will be less fragmentation, of the Forest Service Lands, after the swap. We look forward to working with both entries for the betterment of all lands in the area.
