Title:

Comments: I support this project. I believe it will be beneficial to our community economically as well as provide wholesome recreation opportunities for locals and those living in surrounding areas. This project will create jobs and will fortify and expand the budding tourism economy in this area and will support sustained economic growth in a manner that is not disruptive to the "small town" life that many members of our community so enjoy. I do not foresee any negative consequences to this project that cannot be mitigated through proper planning and execution. The kinds of trails Mena can offer will be amazing and enjoyable to mountain bikers around the state, nation, and hopefully the world. These trails will open nature and wilderness up to the next generation of outdoors people and conservationists.
