Comments: Since it looks like there are numerous houses within 1 mile of the burn area (and 1 cabin about 100 or so feet from the area) what are the plans for fire suppression should the fire get out of control. e.g. Will there be structural fire equipment in the area?

As an avid hiker in the area, I do support this action.

Also, it would have been nice to get notice more then 26 hours before the meeting, and to be given more then a days notice when the actual burn may occur.

I would like to be added to any notifications regarding this project.
