Comments: I absolutely object to the Newark Exploratory Drilling Project #63527. Not only is it skirting a much needed Environmental impact study, but it also blantantly ignores the overall quality of life of the people affected by this project. There is even an elk refuge there in the winter time that would be ruined with this project. This land is a sacred place for so many both now and throughout South Dakota's history and should not be changed so flippantly!
Following through with this "plan" would be a terrible and regretful idea.
