Comments: The greater Yellowstone NP and surrounding area was set aside for the enjoyment of the American people forever. Wildlife moves on n and around the immediate area of the park seasonally and should always have this privilege. Yellowstone must not be hemmed in my people playing games or skiing or anything else Ex spy enjoying the land without changing or harming it. Humans can ski in many places that do no harm to the integrity of a National Park and its surroundings. Do nothing to destroy the integrity of one of America's greatest national Park.
