Title:

Comments: I believe this watershed should be protected because of the cultural significance of the area. Both historic and prehistoric. As an example, the Diana Mine & Gorman Cabin site is designated a multiple component site (historic/prehistoric). The watershed has evidence of settlement, industry (railroads, flumes, etc.) and prehistoric sites that would be lost if development were to be allowed to continue.

Also, the natural beauty of the of the watershed and recreational value of the area and stream could be destroyed.
