Title:

Comments: This project looks incredible and looks to be an incredible use of public lands for the benefit of Mena residents and tourists who come to enjoy the natural beauty of the area. It seems to be planned well for minimal impact on the land which is important.

What this looks like for my family is a way to get my teenagers outside doing physical activities, with new trails to try each time we go. Also, a skills loop to build up confidence. This would greatly benefit my family.
