Comments: I fully support this project. It just makes good sense for this public land to be used for such a wholesome and healthy activity for the general public to use. It has been disappointing in the past to see public land and roads to be closed off to the very people that contribute to the maintenance of them. Land should not lay fallow and be of no use. The prospect of this project would benefit so many people and expose them to some of the most beautiful scenery and nature. Kudos! This is what public land is supposed to be used for.
