Comments: I wanted to add two more additional comments.

I am supportive of the POD development to facilitate fire mgt. in the landscape. Special care in the Spruce/Fir and Brainerd areas needs to be considered with this concept.

Also want to ensure that adaptive management is possible in this landscape. Make sure to provide room for flexibility to adapt by analyzing for effects with actions that may sound outside of the acceptable actions, such as helicopter removal and more consideration of the patch/clearcut work in LP and PP both.
