Comments:

I am commenting in favor of the tailings expansion project. With this project it will extend the mines life and increase the many benefits the mine gives to the communities of southeast Alaska. The mine helps with a lot of youth activities as well as a number of other programs in the communities. Whether in Juneau, Haines, Skagway or any of the other communities in southeast, HECLA Greens Creek goes above and beyond in everything they do. If they don't get the approval for this project, I feel that the communities would feel a negative impact. Thank you for your time.
