Last name: GUTHRIE
Organization:
Title:
Comments: I am Kent Guthrie. I own property at 21719 White Gate Lane, within the Zeppelin Project. The Zeppelin Project has our full support. We have noticed that recent (what we believe to be commercial) logging/thinning activity on Forest Service land varies in the degree of professional standards, ie. the logging that was done within the last ten years behind our property is less than ideal. Other areas that have been logged within the last two years adjacent to our property has much more asthetic appeal. Recent storms and wind have topped many trees in the area, creating dead standing timber and ground level fuel hazards. We would hope that these areas would be cleaned up as part of the commercial thinning efforts. Again, we are 100% on board with the Zeppelin Project and would like to explore the NRCS CIS project for our property. We appreciate the hard work and efforts of the NFS in the Black Hills.
Sincerely, Kent R. Guthrie
