Comments: Public land should be shared by all user groups. The impact of over the snow use from snowmobiles is negligible when compared to other user groups. If that impact became severe then of course better management would be needed. The greatest impact to forest service (public land) at this time is the INCREASED USE. More reason that the land and trails should be expanded to spread user groups out instead of cramming all groups into a few trailheads.

I promote shared use by all user groups. It is unfair and unconstitutional to tell certain user groups they can no longer use public land.
