Comments: Please do not allow this proposed project to happen. We do not need chair lifts to take mountain bikers back up hill. I ride mountain bikes and a well-built trail will not need chair lifts and this type of impact to the land. This project is proposed in a sensitive, watershed area. Construction equipment and paving for parking lots are not an appropriate type of use or management of this area. This project will have a negative impact on the environment and is not needed in this state. There are plenty of mountain bike trails in other areas, that are NOT creating the impact this project will. NO to the trails and mena project.
