Title:

Comments: Rising Wolf Ranch is a guest ranch built in 1925. Restoration started in 1990. The property has been thinned and it is leased to the Nature Conservancy. We are surrounded on 2 sides by the Lewis and Clark, Badger Two Medicine area. Two fires came close as the forest is primarily Lodge Pole Pine 100years old and always looking to ignite. Each year we contact our District Range Mike Munoz hoping the USFS will begin to Manage our forest. The answer is usually "we are trying" but, continuous Law suites initiated by groups like Alliance for the Wild Rockies shut down the good intentions. This effort while not specifically talking about our area renews our efforts to get the USDA involved with Healthy Forest Management. If our family can be of any help getting project 63783 underway, just tell us what you need. Jim Stewart
