Comments: I support the trails being built.

I think it is a great outdoor recreation that compliments the area's already robust outdoor activities like ATV trails, rivers, and hiking.

I also think it could bring tourism and hopefully jobs for families to help support themselves.

This industry also supports our AirBnB market. Homes that are turned into AirBnBs are better maintained and add additional income to families.

I am very hopeful that if the trails were built, that other industries would be interested in Mena that would also create more jobs and provide more services to the people who live here.
