Title:

Comments: Mr Duran,

Its become apparent that both parties ("Opposed to "and "In-favor") have made made so I will not repeat the most common objections to the development (aka. "Water" "Wildlife") and simply make a statement for your consideration. As i'm sure you are aware of TSV has already grown substantially the past few years and now falling victim to the aging infrastructure caused at least in part due to added demand and continued growth. Anyhow, ask yourself when does this end? Lets assume the projects are approved. How long before we are in this very same position yet again with the never-ending requests for yet further projects. Will it be next year?... a few years? Your consideration in this matter is greatly appreciated.

Regards

Michael Gutierrez
