Comments: Progress is good, and a mountain biking trail from the top of Rich Mountain down to Mena sounds good, but the extensive plan for multiple trails and a huge parking lot along with the rest of it will ruin the lovely rustic mountain top that has been a wonderful place to visit for a very long time. I was born in Polk County and have visited the mountain throughout my life even after moving from Polk county many years ago. All of the development would also change the environment for the plants and animals living in this area. Please do not make such a drastical change. Such wonderful, natural places are easily lost forever
