Comments: I have lived in the Black Hills most of my 48 years and have generations of family members from this area. We must protect the water and land for the future generations to come, The Black Hills are sacred and should be kept that way, not mined out to more companies that don't care about human beings or this beautiful area or community. As a long term resident, I am asking you to resist any type of mineral exploration around Pactola Lake - our water source.
