First name: Reggie

Last name: Park

Organization:

Title:

Comments: #1 - Lake Irwin Road Parallel Trail - This could be a great beginner trail and a way to reduce cars and congestion in the Irwin area. Option 2. Would be a lot of work for a beginner trail though, that won't get ridden that much. Should be a low priority.

#2 - Upper Upper to the Brush Creek Trailhead - This trail only makes sense if it remains close to the road and provides a fun downhill to Brush Trailhead. Otherwise I feel most bikers will just skip the connector trail in favor of simply riding the road. Option 2

#3 - Strand Bonus to 409 - This trail could provide a fun connector off the roads. Fully support. ??

#4 - Budd Connection - Ambush to Tent City - Option 1 - Could be useful connector.

#5 - Deer Creek to Tent City - Option 2. I could see that connector being beneficial and getting used

#6 - Teocalli Extension - Could be a fun extension of the descent that will get riders off the road. Fully support. Option 2. ??????

#7 - Reno Divide Road Parallel Trail - Doesn't seem necessary. Should be very low priority.

#8 - Cement Creek Trail - Upper Cement Creek Trail to Crystal- Doesn't seem necessary. Should be very low priority.

#9 - Cement Creek Trail - Lower Cement Creek Trail to Caves - Could get some riders off the road, but I imagine most people will just ride the road to avoid an unnecessary climb on a connector trail.

#10 - Bear Creek Reroute - I don't understand the need to change this trail

#11 - Dr. Park Reroute - Support rerouting away from the mud bog
