Title:
Comments: Dear Sirs:
My family has had cabins in the Black Hills National Forest scince 1925….. in Spearfisf Canyon near Cheyene Crossing and on Tin Cup lane near Browsville. The clean waters and fresh air are precious resources to us and to tourists!

While gold miniing is a big psrt of our hidtory in the Hills, and members of my family have worked in the mines., the cost vs benefit needs to be carefully weighed in these times. It woulf tske a large sustanable sourve os gold to make it at worthwhile to dig for it. Many a big outfit saw large profits in their planning but their business proved unprofitable with in a very few years.
Robert Scott
