Title:

Comments: I'm a native Vermonter, at 73 years old I truly hope this project takes place.

I have always been and outdoors persons, hiking , snow shoeing, hunting and fishing. It is very sad that certain groups try to control what happens to our state and other states across America.

What takes place in the west does not work for the northeast.

Our Forest are old and need to be logged to help wildlife of all kinds.

After attending the meeting Chittenden its very clear to me that the Forest Service has a very good plan to make this happen.

Please don note let the private clubs to stand in your way.
