Title:

Comments: I am all for improvements of the trails in the project area. I believe that the focus should be on maintaining the natural environment, preventing further erosion and respect for all users.

What this means to me:

Limiting mountain biking trails, this would prevent hiker-mt. bike interactions.

Isolate mt. bike trails to prevent hiker-mt. bike interactions

Mt. biking really does cause more erosion. just look at the time lapse photos of the Peaks Trail. It has become much wider especially around corners
