Comments: Thank you for the opportunity to comment:

Please maintain a light touch on trail development. If possible do not decommission established neighborhood trails unless they have some impact on the environment. These are already established -- in most cases improvement will have less impact opposed to decommissioning them and then establishing new trails. Treat the area as a sensitive ecosystem (as it is if indeed it is established Elk habitat). Keep mt. bike trails as far away from the calving areas as possible, maintain a light touch on bridge, turn pike, and trail development.

Thank you
