Comments: Great presentation on May 2nd. It's clear that a lot of thought has went into this comprehensive plan. I am in favor of the new summer bike only/ winter multi-use trail (#25) that would parallel the existing rainbow lake trail. I like the idea of improving and maintaining all of the existing social trails too. Strategic thinning of the forest can't come soon enough.

A couple of suggestions/questions:

- With the increase traffic these changes may bring, I believe the Peaks Trailheads (aka Zach's Stop) will need some improvement to delineate parking spots. As someone who lives down the street, it appears that the parking lot grows a little wider every year, yet doesn't provide additional parking. Is there a plan in place to improve the existing lot?
- Camping on Miners Creek Road is becoming concerning. I've seen a number of groups camping in "No Camping" sites. I've also witnessed a number of a large parties there (20+ people). I'm worried about campers not putting their fire out properly and that spreading to town. Is there a plan to designate and enforce these spots (maybe even add fire rings) like Boreas Pass or Lincoln Creek (Aspen)?

Overall, great job! I'm very excited for the upgrades!
