Comments: There is an absolute need for a sanctioned trail in this region. Anyone riding from downtown Minturn to Meadow Mountain, anyone making a loop from two elk west, cougar ridge, and game creek that intends to ride a loop via the bike path rides through this area. Currently the common trail cuts through the railroad tracks and is generally unsafe and is not sustainable once the railroad decides to stop it or gets the tracks up and running again. Connecting our valley trails should be a no brainer. Thevail valley has the potential to be a world class bike and Hike destination, what is missing is the connections between our trails.
