Comments: I'm in support of HGCMC expanding their TDF and related infrastructure as described in their NEP. I favor Alternative D.

Mines such as HGCMC must pass through stringent and involved permitting processes in this country. I would rather see mines permitted and the life of existing mines extended than more jobs going over seas to countries that DO NOT have the environmental regulations that the USA has.

HGCMC is the largest private employer in the area, supports the community and contributes to the local economy.
