Comments: I am writing in support of this trail connector project. This project would enhance the recreation opportunities being created at the Seven Bends State Park as well as adding a new trail user options originating in the national forest. This project will add a unique feature in allowing trail users to visit both the north fork of the Shenandoah river, and the top of the Massanutten Ridge using natural trail. Both visitors to the new state park as well as national forest trail users can benefit from this addition.
