Title:

Comments: We do not need to add additional wilderness to the Federal Lands. The land must be open for recreational uses for all the Taxpayers and General Public.

Well managed private land has significant lower percentages of losses of timber due to fire. Federal lands that are managed well -- while still burn, have a significantly lower loss of timber due to fires the Wilderness.

Wilderness, non-managed lands burn and burn and burn etc. -- Wilderness lands are nothing more than tree stumps, erosion immense silt into our waterways, Beattle invested garbage that lay into wasted lands.

Federal rule --- 36.CFR 219.7 (c)(2) I will be watching closely to make sure this rule is adhered to while we are going through this revision process.

Final word -- NO NEW WILDERNESS -- Federal lands are the peoples lands and should be open to all recreational use, Motor sports, biking, hiking, skiing, hunting, camping, ETC. ----- Public Lands create Tourism, tax revenue, jobs.

And Federal Lands should be managed to produce high quality timber which creates JOBS, State and Federal tax revenues, and produces revenues for the federal government.
