Comments: I'm not sure why TSV thinks these projects are beneficial. The water alone should be enough to deny permission. TSV already goes over there water usage allotment simply making snow and supporting the businesses in the valley. How the hell does it make any sense to use MORE water? This is the southwest; it's typically dry here. Is it the intention of TSV to take water from everyone down stream? Is it their intention to pollute even more than they already do?

They haven't even updated necessary infrastructure for the projects they've been working on over the past few years.

No one who lives here wants this. Only Louis Bacon and his cronies.

WE DON'T NEED ANY MORE BUSTED WATER PIPES OR SEWAGE CONTAMINATING THE WATER
FLOWING DOWNSTREAM!

LEAVE OUR MOUNTAIN ALONE!
