Comments: My support is ONLY for Mt Emmons which has been a problem for Crested Butte for decades. However, extending through the whole Thompson Divide is an overreach of monumental proportions. Mining and logging are historic practices that have plenty of regulations already placed on them that keep them environmentally sensitive. Our forests have been mismanaged for years from not logging, now we are playing defense against wildfires instead of proactively managing the forests. So called environmentalists always get in the way in the name of green initiatives, but end up ignoring historical precedent. Not having mining on My. Emmons is what they wanted. Give them that and leave the Thompson Divide alone. Thank you.
